NOTICE OF ALLOWANCE

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/21/2005 has been entered.

This Office Action is a Notice of Allowance in response to RCE and Amendment filed 3/21/2005.

Claims 1, 11-15, 21, 25, 27 and 28 have been amended.

Claim 24 is cancelled.

The drawings were received on 3/21/2005. These drawings are acceptable.

Claims 1-23 and 25-29 are allowed. Renumbered as claims 1-28.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior arts of record taken alone or in combination fail to teach, anticipate, suggest or render obvious the claimed invention, as follows:

Independent claim 1, as amended, recites inter alia, an embedded logic portion including a processor and a second JTAG circuit coupled to a first JTAG circuit and to the processor, wherein the second JTAG circuit includes TAP controller coupled to a

second instruction register and to a second plurality of data registers, and at least some of the second plurality of data registers in the second JTAG circuit are designed to perform functions that are not performed by the first plurality of data registers.

Independent claim 11, as amended, recites inter alia, a second JTAG circuit having a second plurality of data registers, at least some of the first plurality of data registers being designed to perform functions not performed by the second plurality of data registers.

Independent claim 21, as amended, recites inter alia, performing a second set of functions using second data registers in the second JTAG circuit, wherein at least some of the second set of functions performed by the second data registers are different than the first set of functions performed by the first data registers.

Independent claim 27, as amended, recites inter alia, a multiplexer having a first input coupled to the first JTAG circuit and a second input coupled to the second JTAG circuit, wherein the second plurality of data registers are designed to perform functions that are not performed by the first plurality of data registers.

Consequently, independent claims 1, 11, 21 and 27 are allowed over the prior arts of record. Claims 2-10, 12-20 and 22, 23, 25 and 26 are directly or indirectly depended upon the independent claims and therefore are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
